Compatible versions for an optimal use:

Win2000 SP1 WinXP SP1 Firefox V1 Adobe Acrobat Reader

The interface language (available in French, English, German or Dutch) can be chosen above right in the screen.

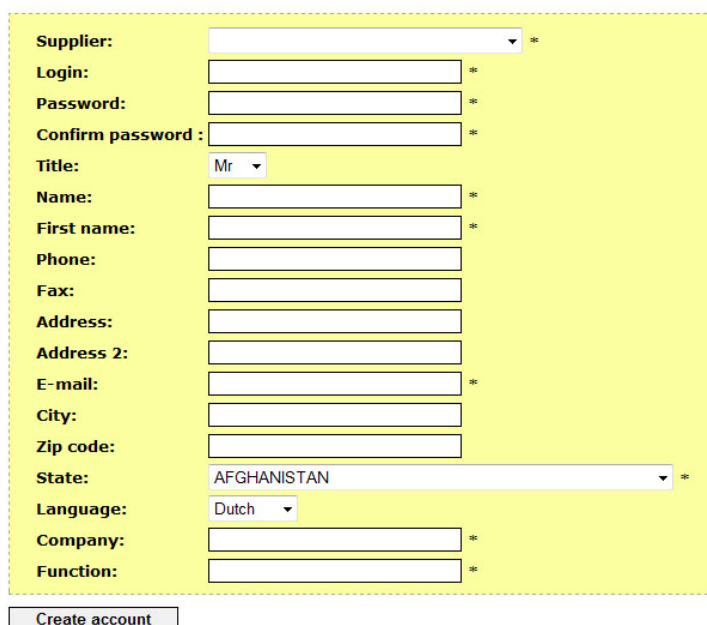

**BEWARE:** The identification fields are case sensitive (Company code, user Login and Password). So beware of the case used when you create a new account.

## REGISTRATION

This homepage gives you an easy access to the registering form (link Create a new account). Type in all the data (including a personal login and password you can freely choose).

! Login specifications: Login and password should be at least 3 characters and identical when logging in under a VVVF supplier.

### OPEN ACCOUNTS:

Some companies offer a public access to any registering user. In this case, you instantly get an e-mail with the chosen login and password. Your account is created and you can access immediately to the company documents.

### LIMITED ACCOUNTS:

Other companies restraint their access to authorised users. In this case, you instantly get an e-mail with the chosen login and password but your account will only be available once your registration has been accepted by the administrator of the company.

- ➔ If the administrator refuses the registration, the account is deleted and you get an e-mail telling you that the access to the company account is refused. Otherwise, you get the message: "We are pleased to inform you that your account creation request is accepted."

**You may create as many accounts as desired to access the different suppliers safety data sheets.**

**VVVF suppliers only require one registration to access all paint suppliers with a unique login/password.**

### PASSWORD RECOVERY

The homepage also includes a password recovery procedure should you forget your password. This procedure allows you to get a new password in one operation on all your accounts.

### PROFILE

Once your password has been reinitialised, you can access your account and change it then into an easier and more personal code. To do this, go to the menu User Profile and click on Edit:

### Subscription

This product is not in your subscription list.

By subscribing to this product you will be warned of any major changes in its safety data sheets.

**Downloading the file may take some time. Please wait.**

► *Subscribe and continue*

► *Continue without subscribing*

Once your document is open, you can save it or close the Adobe window.

**BEWARE:** the subscription to the product is your only guarantee to automatically get the related updates.

### SUBSCRIPTION

One click on the green envelope allows you to subscribe to the product without viewing it first. One line per subscribed document is then added in your Subscription menu. This subscription implies that an e-mail notice informing you about the document update will automatically be sent to you as soon as a new version of the document in the subscribed language is available.

Dear Client,

Updates are now available on PubliChem. Our procedure requires that you acknowledge receipt of it by clicking on the link(s) mentioned below.

Once logged in, click on the View or Download button of the subscribed document to turn the subscription status into ACK.

Unless you follow the procedure, an e-mail will be sent every week from this day onwards.

Have a nice day,

The PubliChem Team.

## ACCESS TO VVVF SUPPLIERS SDS

Paint manufacturers share a common account in Publichem from which you can access all their SDS with a unique login.

When you open an account and log in, you first access a suppliers list where you choose the supplier whose SDS you need to consult:

Choose a supplier in the list, click on Access the products and you open the list of products from the chosen supplier.

The other options remain the same as for other suppliers.
